

DOCUMENT: BRAINSTORMING & IDEA PRIORITIZATION

Phase	Ideation Phase
Document	Brainstorm & Idea Prioritization
Project Name	PetPaws – Pet Foods & Accessories Store
Team ID	[TEAM-ID]
Date	14 June 2026
Maximum Marks	4 Marks

STEP 1 — Team Gathering, Collaboration & Problem Statement

The team gathered to address a real-world pain point: pet owners in India lack a single, domain-specific e-commerce platform that covers all pet care needs — food, accessories, grooming, health supplements, and more. The chosen problem statement is:

"Pet owners struggle to find a reliable, category-rich online store dedicated exclusively to pet products. Existing general e-commerce platforms lack pet-type-specific filtering, verified pet product reviews, and a tailored shopping experience for pet parents."

STEP 2 — Brainstorm, Idea Listing & Grouping

The following ideas were generated by the team during the brainstorming session and grouped by feature domain:

Idea #	Idea / Concept	Category / Group
I-1	Domain-specific pet store with 15 product categories and 8 pet types	Product Catalog
I-2	Verified Purchase badge system for product reviews	Trust & Reviews
I-3	Multi-step checkout wizard (Address → Payment → Review)	Checkout Flow
I-4	Real-time cart badge with MongoDB-persisted cart per user	Cart & Wishlist

I-5	Admin dashboard with monthly revenue bar chart and low-stock alerts	Admin Analytics
I-6	Order lifecycle tracking with status history timeline (Pending → Delivered)	Order Management
I-7	Pet-type filtering (Dog, Cat, Bird, Fish, Rabbit, Hamster, Reptile)	Search & Discovery
I-8	Wishlist with move-to-cart functionality	User Engagement
I-9	Homepage auto-rotating hero banner carousel	UI / Engagement
I-10	Product variant selection (size / weight) with per-variant pricing	Product Management

STEP 3 — Idea Prioritization

Ideas were scored on two axes: Business Impact (1–5) and Technical Feasibility (1–5). A MUST/SHOULD/COULD/WON'T (MoSCoW) framework was applied to assign sprint priority.

Idea #	Idea	Impact (1-5)	Feasibility (1-5)	Priority / Decision
I-1	Pet product catalog (15 categories)	5	5	MUST HAVE — Sprint 1
I-3	Multi-step checkout	5	4	MUST HAVE — Sprint 2
I-6	Order lifecycle tracking	5	4	MUST HAVE — Sprint 2
I-4	Persistent cart + wishlist	4	5	MUST HAVE — Sprint 1
I-5	Admin analytics dashboard	4	4	SHOULD HAVE — Sprint 3
I-7	Pet-type + advanced filtering	4	5	SHOULD HAVE — Sprint 2
I-2	Verified Purchase badge	3	4	SHOULD HAVE — Sprint 3
I-10	Product variants (size/weight)	3	4	COULD HAVE — Sprint 3

I-8	Wishlist move-to-cart	3	5	COULD HAVE — Sprint 3
I-9	Hero banner carousel	2	5	NICE TO HAVE — Sprint 4

Selected Solution: Build PetPaws — a full-stack MERN e-commerce application exclusively for pet products, with domain-specific filtering, verified purchase reviews, real-time cart, multi-step checkout, order tracking, and an admin analytics dashboard.
